

ATF-2 (Phospho-Thr73or55) Antibody

#11032

Catalog Number: 11032-1, 11032-2

Amount: 50µg/50µl, 100µg/100µl

Swiss-Prot No. : P15336

Form of Antibody: Rabbit IgG in phosphate buffered saline (without Mg²⁺ and Ca²⁺), pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol.

Storage/Stability: Store at -20°C/1 year

Immunogen: The antiserum was produced against synthesized phosphopeptide derived from human ATF-2 around the phosphorylation site of threonine 73 or 55 (T-P-T_P-R-F).

Purification: The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific phosphopeptide. The antibody against non-phosphopeptide was removed by chromatography using non-phosphopeptide corresponding to the phosphorylation site.

Specificity/Sensitivity: ATF-2 (phospho-Thr713or 55) antibody detects endogenous levels of ATF-2 only when phosphorylated at threonine 73 or 55

Reactivity: Human, Mouse, Rat

Applications:

Predicted MW: 65-75 kd

WB: 1:500~1:1000 IHC:1:50~1:100 IF:1:100~1:200

Western blot analysis of extracts from HepG2 cells untreated or treated with EGF using ATF2(Phospho-Thr73 or 55) Antibody #11032.

P-Peptide - +

Immunohistochemical analysis of paraffin-embedded human breast carcinoma tissue using ATF-2 (phospho-Thr73 or 55) antibody (#11032).

Immunofluorescence staining of methanol-fixed HeLa cells using ATF-2 (phospho-Thr73 or 55) antibody(#11032, Red).

Background :

Transcriptional activator, probably constitutive, which binds to the cAMP-responsive element (CRE) (consensus: 5'-GTGACGT[AC][AG]-3'), a sequence present in many viral and cellular promoters. Interaction with JUN redirects JUN to bind to CREs preferentially over the 12-O-tetradecanoylphorbol-13-acetate response elements (TREs) as part of an ATF2-c-Jun complex.
