

GluR1 (Ab-863) Antibody

#21254

Catalog Number: 21254-1, 21254-2

Amount: 50µg/50µl, 100µg/100µl

Swiss-Prot No. : P42261

Form of Antibody: Rabbit IgG in phosphate buffered saline (without Mg²⁺ and Ca²⁺), pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol.

Storage/Stability: Store at -20°C/1 year

Immunogen: The antiserum was produced against synthesized non-phosphopeptide derived from Human GluR1 around the phosphorylation site of serine 863 (R-N-S_P-G-A).

Purification: The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.

Specificity/Sensitivity: GluR1(Ab-863) Antibody detects endogenous levels of total GluR1 protein

Reactivity: Human, Mouse, Rat

Applications:

Predicted MW: 110 kd

IF :1:100~1:200

Immunofluorescence staining of methanol-fixed HeLa cells using GluR1 (Ab-863) Antibody (#21254, Red)

Background :

Glutamate receptors are the predominant excitatory neurotransmitter receptors in the mammalian brain and are activated in a variety of normal neurophysiologic processes. These receptors are heteromeric protein complexes with multiple subunits, each possessing transmembrane regions, and all arranged to form a ligand-gated ion channel. The classification of glutamate receptors is based on their activation by different pharmacologic agonists. This gene belongs to a family of α -amino-3-hydroxy-5-methyl-4-isoxazole propionate (AMPA) receptors. Alternatively spliced transcript variants encoding different isoforms have been found for this gene.
