

HistoneH3 (Acety1-Lys4) Antibody

#15575

Catalog Number: 15575-1, 15575-2 **Amount:** 50µg/50µl, 100µg/100µl

Swiss-Prot No.: P68431

Form of Antibody: Rabbit IgG in phosphate buffered saline (without Mg2+ and Ca2+), pH 7.4, 150mM

NaCl,0.02% sodium azide and 50% glycerol. **Storage/Stability:** Store at -20°C/1 year

Immunogen: The antiserum was produced against synthesized peptide derived from

human Histone H3 around the acetylation site of Lysine 4

Purification: The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using

epitope-specific immunogen.

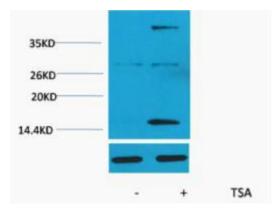

Specificity/Sensitivity: HistoneH3(Acetyl-Lys4) antibody detects endogenous levels of Histone H3 only

when acetylated at Lys4.

Reactivity: Human, Mouse, Rat

Applications:

Predicted MW: 17 kd WB: 1:500~1:2000

Western blot analysis of extracts from Hela cells, untreated (-) or treated

Background: Core component of nucleosome. Nucleosomes wrap and compact DNA into chromatin, limiting DNA accessibility to the cellular machineries which require DNA as a template. Histones thereby play a central role in transcription regulation, DNA repair, DNA replication and chromosomal stability. DNA accessibility is regulated via a complex set of post-translational modifications of histones, also called histone code, and nucleosome remodeling
